By Hudson Hubbard

In the NFL, the San Francisco 49ers and defensive end, Nick Bosa, have agreed to a 5 year contract worth \$170 million with \$122.5 million guaranteed. Chris Jones, defensive tackle for the Kansas City Chiefs, has ended his holdout by signing a one year deal. The Seattle Seahawks have brought back their leading tackler, Bobby Wagner, on a one year contract. In week 1 of the NFL season, Miami Dolphins wide receiver, Tyreek Hill, explodes for 11 receptions with 215 yards and 2 touchdowns. New York Jets quarterback, Aaron Rodgers, tore his achilles and is out for the season.

With the playoff push in the MLB, the top 3 teams in the Wildcard in the American league are the Tampa Bay Rays, Texas Rangers, and the Seattle Mariners with the Toronto Blue Jays a game behind the Seattle Mariners. In the Wildcard for the National League, the top 4 are Philadelphia Phillies, Chicago Cubs, with the Arizona Diamondbacks and the Cincinnati Reds tied for third. The 8 WNBA playoff teams are the Las Vegas Aces, New York Liberty, Connecticut Suns, Dallas Wings, Atlanta Dream, Minnesota Lynx, Washington Mystics, and the Chicago Sky. The top 2 teams that are projected to win are the Las Vegas Aces and the New York Liberty.

Deforestation

By Ayden Schiller

There are many different aspects to deforestation. One negative result of deforestation is global warming, even though it only causes about 10% of it. Completely destroying forests gets rid of animals' homes, alters the landscape, and releases more carbon dioxide into the air. On the other hand, deforestation provides more usable land, increases income, earning opportunities, and creates jobs. Deforestation allows us to access certain products that we need and opens possibilities for transportation. People have different opinions about deforestation. I personally would disagree with deforestation because it means robbing animals of their homes, along with global warming. Even though deforestation provides new opportunities, the risk is too high. There is no need to be harming the Earth's plants and animals.

NHL News(old scores)

By Easton Salvati

Free agents of hockey for the Kraken Defenseman, Mitch Reinke, has landed in Seattle, by way of a one-year, deal of \$775,000 with the Kraken. Veteran free agent forward, Devin Shore, has landed with the Kraken, by way of a one-year, \$775,000 pact. Defenseman, Vince Dunn, will be sticking around in Seattle, agreeing to terms on a four-year, \$29.4 million contract. Seattle will remain in the Cale Fleury business, as the two sides agreed to a two-year, \$1.6 million contract. Restricted free agent forward, Kole Lind, is back with the Kraken by way of a one-year, \$775,000 contract. Seattle makes a pair of veteran signings: defenseman, Will Borgen (two years, \$5.4 million) and forward, Pierre-Edouard Bellemare (one year, \$775,000). After being bought out by the Red Wings, Kailer Yamamoto has inked a

one-year, \$1.5 million deal with the Kraken.

Another former Penguin is headed to Seattle, as the Kraken have signed defenseman, Brian Dumoulin, to a two-year, \$6.3 million deal.

 Vegas at Colorado: Recap:2-3
 Calgary at Seattle: Recap:5-3
 Who is predicted to win Stanley Cup 2023.
 The Vegas Golden Knights are currently predicted to win the Stanley Cup. Who are the top contenders for the Stanley Cup this season? The Florida Panthers and Vegas Golden Knights are two remaining contenders to win the Stanley Cup. The Florida Panthers +900 are in the Stanley Cup Final after sweeping Carolina yet they find themselves in a 3-1 hole and just one loss away from their season ending. Meanwhile, the Vegas Golden Knights -1,500 are sitting pretty after their Game 4 victory in which they held onto a 3-0 lead. Nobody can argue that Florida was the inferior team in the first four games, and in all honesty, the Panthers were also outclassed in Game 3 but Matthew Tkachuk tied the game with 2:13 remaining in the third period and Florida squeaked out another OT win to get back into the series. The Cats may have finally ran out of their nine lives.

The City of Los Altos, California
By Korbin Young

I think Los Altos would be a good neighborhood if you wanted to live closer to the beach. Los Altos is a vibrant and thriving city known for its excellent schools, strong economy, and high quality of life. It is called Los Altos because the land was the highest in terms of tree removal. Also families will enjoy walkable access to the great public schools in Los Altos for their children. I strongly recommend visiting Redwood National and State park because of their immense and unique beauty. You could also visit the giant sequoia tree which is the largest tree in the world in volume and has an immense trunk with very slight taper. The redwood is the world's tallest tree and has a slender trunk. The redwood forest is free, costing you no money when you visit. I Would not want to touch the redwood trees because it can hold disease and could

damage the trees. Don't be scared of trees falling because they rarely ever fall. You could also visit the Los Altos museum. You could also go to the largest water park called Wild Water. From its beginnings in 1908, Los Altos was recognized as one of the premier apricot producing centers of the world. Sadly, those famous orchards gradually became tracts to house the huge influx of people moving to this area after World War II. The Los Altos Pet Parade has been among the most beloved traditional community events since its inception in 1948. In 1938, a group of Los Altans tried to re-name San Antonio Road, "Los Altos Avenue", but enough citizens objected to defeat the proposal, arguing on the historical ground that Los Altos was built on land once part of the Spanish land grant, "Rancho San Antonio." You could send your kids to the summer cottages and apricot orchards.

Los Altos became the eleventh city in Santa Clara county on December 1, 1952. Los Altos is also known for its scenic views of the foothill, high quality of life and excellent schools. The only thing to consider is it's the fourth on the list of California's Wealthiest cities. It's so expensive because of its high demand, Low inventory and population

projections. Also housing expenses are 690% higher than the national average. The chances of getting robbed is one to eighty-five percent. The downtown of Los Altos is a walkable environment. Los Altos might be renamed in memory of Roy Lave. People that live in Los Altos have a high quality of life. If you were planning to move to Los Altos I would advise you to live In Los Altos Hills. It has a very low crime rate.

You can save the planet!!!
Myla Stone

Many animals are endangered, some very few left, but that's because of people. The resources that we use everyday are plastic, whether it's straws, plastic cups, toys, water bottles and more that are just killing the planet. Every drink from a plastic resource that you drop will end up in a turtle's mouth or around the turtle's neck, even if it's in an accident. I know it sounds terrible but it's true, it's the human resources that are doing this to our poor beautiful habitat. When you litter, that's one step away from an animal dying.

These are all the ways you can help. Many people are doing charities right now to raise money for new glass straws. For example Team Seas has a program where every penny you spend is going to take one bag out of the ocean of trash. Also like I said about the glass straws that you can use are reusable and not plastic so it technically wouldn't go to the ocean. Littering is a big problem. If you litter you usually would get the fine of \$50 in Washington State per cubic or plastic you drop. So please it would really help if you could stop littering and dropping your plastic. PICK UP AFTER YOURSELF!

Hurricane Idalia
By Aubery Lawley

Hurricane Idalia was a powerful Category 4 hurricane. Idalia caused significant damage across the Big Bend region, south to Tampa Bay. It also caused a tornado outbreak with 12 confirmed cyclones. Idalia was the most powerful hurricane to hit Florida since the 1896 Cedar Keys Hurricane. Estimates have placed that the damage destroyed \$2.2-\$5 billion. The hurricane resulted in powerful and dangerous rip currents. The rip currents were across the Eastern United States on Labor Day Weekend.

(Continued on next page, first column)

When Idalia formed, the wind speeds were 40 miles per hour. The wind speed kept on increasing day by day. It started in Cuba, as a Category 1 hurricane. Later on in the day, it became a Category 2 hurricane. As Idalia traveled, it went through benefiting environments, causing it to become a Category 4 hurricane in the morning, on August 30. The wind speed became 130 miles per hour at max.

There was a lot of flooding. People were trying to save their houses and land as much as possible. Due to the flooding,

there was a lot of damage. Some of the damage could have

been unfixable. There were places that the people that had damages due to Idalia could go and get help with money, help with construction/rebuilding, etc.

Idalia had a large impact on the Big Bend region of Florida. The hurricane made a large impact on Florida and the people living there.

Hello Carbonado!!!!

By Eva Hibbs

Our school had previously set up a book fair for all of the students this year. Everyone who goes to Carbonado and a few family members had a lot of fun getting new books and a few trinkets. The staff here at Carbonado try their best to mix learning with the perfect amount of fun. I think the bookfair was

just that. With books such as “Never Never”, “FGTeeV”, “We are Family”, and many others. I guarantee that each and every child found the perfect book from mysteries to videogames.

Read-Walk-A-Thon:

Our school’s annual Read-Walk-A-Thon was a success. This year our goal was set at \$8,000 and the students here at Carbonado raised exactly \$7,918! Our top three prize winners with the highest amount raised were Henry Mayeux in 1st grade, Hudson Korsch in E-K, and Riley Murphy in 3rd grade. These three students weren’t the only ones to raise money, in fact all of the students chipped in and raised at least a little bit to help support our school. Many of our students and their families have participated by filling out the donation forms sent home with students. By donating just a small amount of money you and your child have helped our school immensely. There were prizes given out to the students and families who participated. Before the prizes were handed out there were activities such as bouncy houses, obstacle courses, and more participated in by our students. Carbonado does the Read-Walk-A-Thon to raise money for supplies like pencils, erasers, and even computers. They also use the money to reward students with events, classroom supplies, fun little incentives, and field trips to places like Maris Farms and The Pierce College Science Dome. Whether you are a student, parent, or grandparent, thank you so much for supporting our school and our community.

Field Trips

By Aurora Argo

You have probably heard your child or grandchild tell you stories about the amazing field trips they went on. Carbonado School takes students on trips every year to make learning as fun as possible! Several field trips have taken place so far this year.

Thomasson Farms:

Early K - Kindergarten

The Early K and Kindergarten class went on a field trip to Thomasson Farms pumpkin patch in October. Each child picked out a pumpkin of their choice. That’s not all they did, however. The kids also got to play in the corn pit, take a tractor ride, and climb on hay bales. The farm also offered a lesson on cows. The students learned how to feed cows, how much water to give them, and how to care for calves. The Early Kindergarten and Kindergarten classes had a great time at Thomasson Farms.

Camp Seymour:

5th Grade

On September 19th, our fifth graders went to Camp Seymour, an activity-filled camp run by the YMCA. One activity the kids enjoyed was archery. The range was run by a well-trained group of counselors. The camp also offered canoeing.

The 5th graders learned valuable teamwork skills while paddling around the lake with their peers. It's not so easy trying to maneuver around while three people are paddling the same boat in different directions! As fun as the lake was, I think many students would say that nothing beat their experience with reptiles. Each student had the opportunity to meet a bearded dragon, a borrough snake, and a tortoise. Our fifth graders had a memorable time at Camp Seymour!

Science Dome:

6th and 7th Grade

The Pierce College Science Dome is a digital planetarium that allows visitors to view the night sky anytime. Our 6th and 7th graders will visit the Science Dome in late fall. It is both fun and educational for all ages. The students will be immersed in breathtaking images of the universe. The Science Dome offers opportunities for people to interact with an alien environment, explore the pyramids, and so much more! Our 6th and 7th graders will have the time of their lives at the Peirce College Science Dome.

Is Eastern Washington Next to Become a Different State?

By Craig Caddy

Eastern Washington and parts of Idaho are trying to form the State of Liberty. This was proposed from the U.S. to be formed as a state out of Eastern Washington.

It was proposed by Shea at House Memorials in 2015 and 2017, submitted in a failed bill proposal in 2019 by Matt Shea and Bob McCaslin Jr. This proposal still has the potential to be brought back into the senate.

This will be brought in with a different state such as Washington D.C. or Puerto Rico.

There were also different proposals for the name of the state such as Columbia.

This was proposed from the democratic form in two different areas: one republic and one democratic. This would allow the two areas to allow different rules and almost two different ways of life. Due to the separation of the two states the economy of both might change to focus on what the area's economy is known for. The state of Washington is more tourism based and the Statue of Liberty being agriculture and logging. East of the Cascade Mountains would be all the Statue of Liberty, making some people move to the other side of the cascades.

Space News **By Kaden Oles**

New space-related discoveries have been made over the past few months, and they are quite interesting. The months range from August to September. On the third of August, astronauts discovered a Jupiter-sized planet orbiting a low mass star called TOI-4860.

Another discovery relating to space was found on the sixth of September. Astronomers detected the magnetic field of a galaxy so far away that light has taken over more than 11 billion years to reach us. Another fascinating fact is that Artemis 3 is planned for 2025 and it will mark humanity's return to the lunar surface after 50 years.

Scientists at NASA have found an Earth sized planet within the large zone of its star. Nasa has more information on the James Webb space telescope into k2-18 has revealed the presence of carbon-bearing molecules including methane and carbon dioxide.

Carbonado Sports

Fall Season

By Lilly Banks

VOLLEYBALL

The first girls sport at carbonado school is volleyball.

The varsity team had an undefeated season and the JV team won 4 games and only lost 1 game.

Team Roster

Zoe Huhtala
Kylee Thompson
Ali Ann Vessey
Zada Fielding
Lela Parson
Delainey Crucsh
Aurora Argo
Evangeline Hibbs
Myla Stone
Jessica Tippet
Athena Napolitano
Aubrey Lawly
Reese Huizenga
Zoie Crones

TRACK

Track started down at Glacier for our middle school athletes. Their first meet on Sept. 21st went well, Glacier took first in the meet. Their second meet was great, Glacier took first place again. Glacier won their third and fourth meets as well.

At the JV League Meet our JV girl runners won their meet and our JV boy runners placed 3rd.

At the Varsity League Meet our Varsity runners took 1st and our Varsity boy runners took 3rd.

Team Roster

Lucy Sellers
Lilly Banks
Jack Thatcher
Wesley Banks
Hudson Hubbard
Chandler Huizenga
